A BLISTER STRIP FOR AN INHALER

5 A blister strip (20) for use in a fluid or powder
inhaler, and including a plurality of blisters, each
formed by a reservoir (21) including an opening (25) that
is sealed in leaktight manner by a tearable layer (7, 5),
the blister strip (20) being characterized in that it
10 comprises at least a base layer (6) that is provided with
openings (25) forming the openings of the blisters, and a
cavity layer (8) that is provided with cavities forming
the blister walls (21), said tearable layer (7, 5)
comprising a first tearable-layer portion (7) that is
15 disposed between said base layer (6) and said cavity
layer (8), and a second tearable-layer portion (5) that
is disposed on the opposite side of said base layer (6),
said first and second tearable-layer portions (7, 5)
being connected together at each opening (25) of the base
20 portion (6).
